- E-mail: fennu637@sina.com / Phone：18918561263

Open Source Projects

- Chorus: An Agent harness framework based on AI-DLC methodology, adopting Reversed Conversation mode (AI proposes, humans review), enabling AI Agents and humans to collaborate on product delivery from Idea to Proposal to Task
  - Claude Code Plugin: Automatic Session management and context injection for Sub-Agents in Agent Teams (Swarm) scenarios via Hooks mechanism
  - OpenClaw Plugin: SSE + MCP dual-channel architecture enabling AI Agents to autonomously detect tasks and drive product delivery 24/7

Working Experience

Amazon Web Services （2023.6 ~ Present）

Solutions Builder/AWS Solutions （2023.6 ~ Present）

Design and develop AWS-based industry solutions, focusing on healthcare and AI Agent domains

- Solution Development:
  - Developed MCS (Marketing & Commercial Set), an AI-powered knowledge management and training assistant for pharmaceutical sales teams based on Strands Agents and `Amazon Bedrock`. Built GraphRAG knowledge graph with `Amazon Neptune` + `OpenSearch Serverless`, supporting STAR case methodology, AI-driven sales strategy recommendation and simulation training
  - Developed Medical Deep Insights, a medical content generation assistant based on Strands Agents. Supports rapid Agent and Tool generation via YAML configuration and AI coding assistant (Skill), integrates 15+ tools including PubMed/clinical trials/patent search, extends capabilities through MCP protocol, deployed on `Bedrock AgentCore`
  - Developed Medical Insights Hub, an AWS-based medical content generation solution. GenAI-powered professional medical document translation with `OpenSearch Percolate` supporting million-level glossary matching; supports integration with external knowledge bases like PubMed for collaborative medical content generation, with Word plugin integration

SAP Labs China （2016.10 ~ 2023.6）

Architect, Web development (Frontend/backend), DevOps and data engineer.

Architect/SAP Concur （2021.1 ~ 2023.6）

Design and develop SAP Concur eFapiao, a fapiao auto-recognition and validation system based on `NodeJS` and WeChat mini program

- DevOps:
  - Operating and deploying the project on AWS and `Kubernetes`
  - Service registration and discovery based on Concur customized `Istio`+`Envoy` service mesh
- Backend development:
  - Backend service based on `NodeJS` and `NestJS` framework
  - Data backend based on AWS distributed database `DynamoDB`
- Data engineering:
  - Collecting metrics generated by the running service and integrating with data pipeline via `AWS S3` and `AWS Kinesis` data stream
  - Utilizing `AWS Glue Job` to implement data ETL jobs based on `Spark`
  - Utilizing `Grafana` and `AWS Athena` to query and visualize collected metrics data
- Machine learning:
  - Deploying OCR model based on `PaddleOCR` to mark unrecognized fields of fapiao images
  - Training key information extraction model based on `SDMG-R` to extract key fields from fapiao images

Senior DevOps/SAP Jam Collaboration （2019.3 ~ 2020.12）

SAP Jam Collaboration is a collaboration tool based on `Ruby on Rails`/`React`.

- Led the DevOps team to migrate the project from on-premise data centers to AWS `Kubernetes`, managing infrastructure and GitOps workflows with `Terraform`/`Helm`/`ArgoCD`
- Introduced `Consul`+`HAproxy` for service discovery, deployed `Istio` Service Mesh for canary deployment and traffic monitoring
- Collaborated with international teams, supporting around-the-clock DevOps operations across multiple timezones

Full Stack Developer/SAP Jam Collaboration （2017.10 ~ 2019.3）

- Frontend: Built `BackboneJS` → `React`/`TypeScript` migration abstraction layer, enabling old and new code coexistence
- Backend: Developed `NodeJS`-based SSR service, `Golang`-based multi-storage file service (S3/Azure Blob/NAS)

Frontend Developer/SAP Jam Community （2016.10 ~ 2017.10）

Frontend development for a social platform based on `EmberJS`/`Vue`/`Ruby on Rails`

Certifications

Skills

Familiar with

- AI/Agent: Strands Agents/Claude Code Plugin/OpenClaw Plugin/LangChain/Amazon Bedrock/MCP/SSE
- Web development: TypeScript/JavaScript/Python/HTML/CSS/Webpack/NodeJS
- DevOps: AWS/Docker/Kubernetes/Terraform
- Web framework: React/Next.js/FastAPI/Vue/NestJS
- Data engineering: AWS Athena/AWS DynamoDB

Know about

- Web development: Ruby on Rails/GraphQL/Golang/SEO
- DevOps: Jenkins/Service Mesh/Istio/Helm/ArgoCD/GitOps
- Data engineering: AWS Glue(Spark)/MySQL
- Machine learning: PaddlePaddle/CNN/SDMG-R
