

Personal Information

- **Felix Chen**/Male
- Master/Graduated at 2017/East China University of Science and Technology/Computer Science and Technology
- Blog: <https://chennima.github.io/blog>
- Github: <https://github.com/ChenNima>
- LinkedIn: <https://www.linkedin.com/in/yifei-chen-990199110/>
- E-mail: fennu637@sina.com / Phone: 18918561263

Open Source Projects

- **Chorus**: An Agent harness framework based on **AI-DLC** methodology, adopting Reversed Conversation mode (AI proposes, humans review), enabling AI Agents and humans to collaborate on product delivery from Idea to Proposal to Task
 - **Claude Code Plugin**: Automatic Session management and context injection for Sub-Agents in Agent Teams (Swarm) scenarios via Hooks mechanism
 - **OpenClaw Plugin**: SSE + MCP dual-channel architecture enabling AI Agents to autonomously detect tasks and drive product delivery 24/7

Working Experience

Amazon Web Services (2023.6 ~ Present)

Solutions Builder/AWS Solutions (2023.6 ~ Present)

Design and develop AWS-based industry solutions, focusing on healthcare and AI Agent domains

- Solution Development:
 - Developed MCS (Marketing & Commercial Set), an AI-powered knowledge management and training assistant for pharmaceutical sales teams based on **Strands Agents** and **Amazon Bedrock**. Built GraphRAG knowledge graph with **Amazon Neptune** + **OpenSearch Serverless**, supporting STAR case methodology, AI-driven sales strategy recommendation and simulation training
 - Developed **Medical Deep Insights**, a medical content generation assistant based on **Strands Agents**. Supports rapid Agent and Tool generation via YAML configuration and AI coding assistant (Skill), integrates 15+ tools including PubMed/clinical trials/patent search, extends capabilities through MCP protocol, deployed on **Bedrock AgentCore**
 - Developed **Medical Insights Hub**, an AWS-based medical content generation solution. GenAI-powered professional medical document translation with **OpenSearch Percolate** supporting million-level glossary matching; supports integration with external knowledge bases like PubMed for collaborative medical content generation, with Word plugin integration

SAP Labs China (2016.10 ~ 2023.6)

Architect, Web development (Frontend/backend), DevOps and data engineer.

Architect/SAP Concur (2021.1 ~ 2023.6)

Design and develop SAP Concur eFapiao, a fapiao auto-recognition and validation system based on **NodeJS** and WeChat mini program

- DevOps:
 - Operating and deploying the project on AWS and **Kubernetes**
 - Service registration and discovery based on Concur customized **Istio** + **Envoy** service mesh

- Backend development:
 - Backend service based on **NodeJS** and **NestJS** framework
 - Data backend based on AWS distributed database **DynamoDB**
- Data engineering:
 - Collecting metrics generated by the running service and integrating with data pipeline via **AWS S3** and **AWS Kinesis** data stream
 - Utilizing **AWS Glue Job** to implement data ETL jobs based on **Spark**
 - Utilizing **Grafana** and **AWS Athena** to query and visualize collected metrics data
- Machine learning:
 - Deploying OCR model based on **PaddleOCR** to mark unrecognized fields of fapiao images
 - Training key information extraction model based on **SDMG-R** to extract key fields from fapiao images

Senior DevOps/SAP Jam Collaboration (2019.3 ~ 2020.12)

SAP Jam Collaboration is a collaboration tool based on **Ruby on Rails** / **React** .

- Led the DevOps team to migrate the project from on-premise data centers to AWS **Kubernetes** , managing infrastructure and GitOps workflows with **Terraform** / **Helm** / **ArgoCD**
- Introduced **Consul** + **HAproxy** for service discovery, deployed **Istio** Service Mesh for canary deployment and traffic monitoring
- Collaborated with international teams, supporting around-the-clock DevOps operations across multiple timezones

Full Stack Developer/SAP Jam Collaboration (2017.10 ~ 2019.3)

- Frontend: Built **BackboneJS** → **React** / **TypeScript** migration abstraction layer, enabling old and new code coexistence
- Backend: Developed **NodeJS** -based SSR service, **Golang** -based multi-storage file service (S3/Azure Blob/NAS)

Frontend Developer/SAP Jam Community (2016.10 ~ 2017.10)

Frontend development for a social platform based on **EmberJS** / **Vue** / **Ruby on Rails**

Certifications

Skills

Familiar with

- AI/Agent: Strands Agents/Claude Code Plugin/OpenClaw Plugin/LangChain/Amazon Bedrock/MCP/SSE
- Web development: TypeScript/JavaScript/Python/HTML/CSS/Webpack/NodeJS
- DevOps: AWS/Docker/Kubernetes/Terraform
- Web framework: React/Next.js/FastAPI/Vue/NestJS
- Data engineering: AWS Athena/AWS DynamoDB

Know about

- Web development: Ruby on Rails/GraphQL/Golang/SEO
- DevOps: Jenkins/Service Mesh/Istio/Helm/ArgoCD/GitOps

- Data engineering: AWS Glue(Spark)/MySQL
- Machine learning: PaddlePaddle/CNN/SDMG-R
